

Minimize Falls!

And Keep Your Patients Warm at the Same Time...

We know that trips and falls on ward is costing the NHS a lot of time and unnecessary expenditure.

Our premium slipper socks have been developed in conjunction with a major NHS Foundation Trust in an effort to reduce the number of slips, trips and falls. Since the introduction of the socks in 2012, along with other measures, the number of falls in the Trust has reduced by a staggering 48%!

Our sock is made from Latex-free, soft Chenille style Polyester with non slip grippers from the tip of the toe to the back of the heel – ensuring the patient's feet are protected from the moment they place a foot on the floor.

The socks are available in 3 sizes:

- Navy blue - male
Code: PTP149
- Cyan blue – female
Code: PTP150
- Lime green – children
Code: PTP188

Socks come in pairs and also available packed as part of a patient pack.
(As standard, all premium sock types come in cartons of 180 pairs)
